

Hanger Bracket Mounting Assembly

- Designed to fit the 3-in-ONE & 4-in-ONE AirPower Lines and traditional straight lines
- All stainless steel construction prevents corrosion
- Rubber covering protects lines in non-wrapped applications
- Speed clip makes tender kit / pogo stick installation a "snap"

Consult the new Tectran full-color catalog for information about our suspension devices required for suspending the AirPower Line off the tractor deck.

AirPower Line

All-in-ONE Hook-up Line Solutions

The AirPower Line...

Tectran Spiral Wrap gathers all lines into a tangle-free bundle and improves abrasion-resistance

2 x 3/8" ID SAE J1402 Rubber Air Lines

SAE J560 plugs with WeatherSeal sleeves for superior corrosion protection and strain relief

Factory-cripped Swivel Fittings for a leak-free air system & easy tractor connection

TECTRAN'S New FLEX-Grip

- Tapered elastomeric handle flexes with the air line in tight turns
- Thicker at the fitting for kink protection during gladhand connection

Did You Know...

For users who prefer the flexibility of straight lines but are concerned about abrasion or snagging, Tectran's unique AirPower Line offers a package of some of the industry's best features in a neat, fully-protected, long lasting bundle.

3 in ONE

The 3 in ONE AirPower Line contains:

- Service air line
 - Emergency air line
 - ABS power line (green w/ standard 7-way plugs)
- all enclosed in spiral wrap.

Red and Blue FLEX-Grips provide easy line identification along with kink protection during gladhand connection and tight turns.

Air lines have swivel fittings at tractor end for quick installation. Power line is fully ABS compatible.

3 in ONE

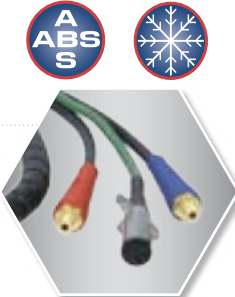

ARTICFLEX

The 3 in ONE Articflex AirPower Line contains:

- Service air line rated -65°F
 - Emergency air line rated -65°F
 - ABS power line rated -85°F (green)
- all enclosed in spiral wrap.

Red and Blue FLEX-Grips provide easy line identification along with kink protection during gladhand connection and tight turns.

The Articflex air lines have swivel fittings at tractor end for quick installation. The power line is fully ABS compatible Articflex cable.

4 in ONE

AUXILIARY

The 4 in ONE AirPower Line contains:

All the components of a 3-in-ONE AirPower line with an added Auxiliary power line (yellow w/ inverted ground pin auxiliary plugs) all enclosed in spiral wrap.

Red and Blue FLEX-Grips provide easy line identification along with kink protection during gladhand connection and tight turns.

Air lines have swivel fittings at tractor end for quick installation. Power line is fully ABS compatible.

4 in ONE

TAILGATE

The convenience of the AirPower Line designed with an added tailgate power line.

The 4 in ONE Tailgate AirPower Line contains:

- Service air line
- Emergency air line
- ABS power line (green)
- Single or Dual 4 gauge Tailgate cable
- Single-Pole or Dual-Pole or Mixed grounded tailgate plugs.
- WeatherSeal plug protection

Single Pole / Single Cable

Dual Pole / Dual Cable

Single Pole / Dual Cable

1 Single & 1 Dual Pole / Dual Cable

An excellent solution for fleets that require auxiliary power to supply a trailer tailgate, power tarp, or battery charging system.
